

### Queen Victoria - Surface Printed 3d Issues.

The 3d stamp was introduced in the early 1860's, printed by Thomas De La Rue using a surface printing technique as opposed to line engraved. The design consists of the Queen's head in what looks like a horse's collar, within which are the words **THREE PENCE POSTAGE**. In each of the corners is a trefoil arrangement within which are placed small white corner letters reflecting the position of the stamp on the printing plate. The 'spandrels' are shaded. Although plate 1 was defective, plate 2 was registered and put to press on **17<sup>th</sup> October 1861**. However, it was considered to be too similar to the corresponding 4d value and was never issued.

The shading to the 'spandrels' on plate 2 were removed and the plate put to press again on the 19<sup>th</sup> March 1862. The stamps were issued to the public for use on **1<sup>st</sup> May 1862**. A plate 3 was produced, exactly as plate 2, but with two small white dots either side of the word 'Postage', and registered 25<sup>th</sup> August 1862. However, plate 3 was for some reason never 'put to press'.

*Not surprisingly, none of the above stamps have yet been reported with a Perfin!*

The basic design was modified to incorporate a **visible** plate number, and large **white** corner letters against a **coloured** background. Plate 4 was the first to be issued in this new format, being put to press on 19<sup>th</sup> December 1864, and issued on **1<sup>st</sup> March 1865**. In **July 1867** the watermark changed from 'Emblems' to 'Spray' which involved printings from plate 4, along with the next six plates, plates 5-10.

The next change, effective from **5<sup>th</sup> July 1873**, was to alter the corner letters to become **coloured** against a **white** background. This change was introduced specifically to save time during plate production. Plates 11-20 (excluding plate 13, which was defective) can be found with this arrangement, again on 'Spray' watermarked paper. Another change of watermark, this time to the 'Imperial Crown', occurred in **February 1881**. This also involved a re-arrangement of the printing plate to make two panes, each of 120 stamps arranged in ten rows of twelve. Plates 20 and 21 were printed from in this new format.

The final throw of the dice regarding the issue was a change of colour to *Purple, overprinted "3d" in Carmine*, a process probably carried out at Somerset House. The so-called 'Surcharge' stamp (along with a companion 6d stamp) was issued on the *1<sup>st</sup> January 1883*, shortly to be replaced by the 3d (and 6d) stamps from the 'Lilac & Green' issue on 1<sup>st</sup> April 1884.

TOTALS for the Surface Printed 3d issues.

Plate 21	'Surcharge' issue	Introduced 1883	Imperial Crown	224

Please note that no attempt has been made in the table to differentiate between the different watermarks found on plates 4 and 20.

Perfin figures are correct to *1<sup>st</sup> July 2018*.

Perfin die details for the 'Surcharged' *3d on 3d* and *6d on 6d* can be found as a separate study.

To help resolve the 'ambiguous' entries, perhaps you can check to see if you have any of the following dies on the relevant plates:
